

Hello there! We're delighted to have you here! We understand that certain questions come up often, and we want to make sure our community stays fresh with new discussions. That's why we've put together this helpful guide to address those commonly asked questions. Below, you'll find a list of most popular countries in the group, showcasing the products that are widely used in each of these places. If your country is not included in the current list, kindly inform us as this list is continuously being updated.

Here is a video of alternatives to Cement All

Disclaimer: The majority of the products mentioned below have not been tested beyond the United States. The list comprises commonly used products in their respective countries. It is highly recommended that you thoroughly test any products you use. We cannot be held liable for any problems or complications that may arise.

If you are unable to find a specific concrete sealer, I recommend reaching out to your local hardware store for assistance. They should be able to provide recommendations for suitable concrete sealers. However, it's important to note that not all sealers are suitable for candle making. To help you in locating a suitable sealer, you can refer to the video listed below for guidance.

Here is a quick video on how to use Earth Safe Finishes Quick Dip Sealer.

For more help on create concrete candles please subscribe to the UP Vibe Youtube channel -> www.youtube.com/@upvibecandle
